

# SHRAVANI BALU DHAYBAR

## ASPIRING CLOUD & APPLICATION SECURITY ENGINEER

8149528801 | dhaybarshravani004@gmail.com | [www.linkedin.com/in/shravanidhaybar](https://www.linkedin.com/in/shravanidhaybar) | [github.com/shravanidhaybar01](https://github.com/shravanidhaybar01)

### PROFESSIONAL SUMMARY

B.Sc. Cyber & Digital Science student (**9.64 SGPA**) with hands-on internship and project experience in **web application security, vulnerability assessment, reconnaissance, network security, and security testing**. Interested in Cloud Security, Application Security, penetration testing, and cybersecurity research.

### EDUCATION

**SY B.Sc. Cyber & Digital Science — Vishwakamal Mahavidyalay, Talegaon Dabhade**

Savitribai Phule Pune University (SPPU), Pune, Maharashtra | FY SGPA: **9.64 / 10** | SSC: 88.60% | HSC: 72.17%

### TECHNICAL SKILLS

**Cybersecurity:** Web Application Security, Vulnerability Assessment, Network Security, Reconnaissance, Basic IDS

**Security Tools:** Nmap, Burp Suite, SQLMap, Gobuster, Nuclei, Nikto, OWASP ZAP, Metasploit, Wireshark

**Programming & Data:** Python, SQL, Excel, Power BI, Pandas, NumPy, Matplotlib

**Systems & Platforms:** Linux, Kali Linux, Ubuntu, Git, GitHub, VS Code, VirtualBox

### EXPERIENCE

**Cybersecurity Intern — UpToSkills**

May 2026 – July 2026 | 3 months

- Performed web application reconnaissance and security assessment.
- Used Nmap, Burp Suite, Nikto, Gobuster, SQLMap, Nuclei, OWASP ZAP, and Metasploit Framework for controlled security testing.
- Practiced vulnerability assessment, web application security, reconnaissance, and security testing methodologies.

**Data Analytics Intern — Imarticus Learning**

July 2026 – August 2026 | 1 month

- Worked on data analysis and visualization using Excel, Power BI, Python, and SQL.
- Performed data cleaning, transformation, and exploratory analysis.
- Created a Supermarket Sales Dashboard using Excel.

### CYBERSECURITY PROJECTS

- **SafeLine WAF Home Lab:** Configured SafeLine WAF with DVWA in a VirtualBox-based Ubuntu/Kali Linux lab environment for web attack detection and traffic filtering.
- **Basic Intrusion Detection System:** Developed a basic IDS using Python and Scapy to monitor network packets and identify suspicious traffic.
- **Packet Sniffer:** Developed a Python-based packet sniffer using Scapy to capture and inspect network traffic.
- **Security Log Analyzer:** Built a security log analysis project to identify suspicious patterns from system and application logs.
- **File Integrity Checker:** Developed a Python-based file integrity monitoring tool using hashing to detect unauthorized file modifications.
- **Ai Phishing Email Detector:** Developed a project to analyze email characteristics and identify potentially malicious messages.

### DATA ANALYTICS PROJECTS

- **Supermarket Sales Dashboard:** Created an interactive Excel dashboard to analyze sales performance, product trends, and business KPIs.
- **SQL IPL Match Analytics:** Used SQL queries to analyze IPL match data and derive statistical insights from structured datasets.
- **Python & SQL Data Analysis:** Performed data cleaning, exploratory analysis, and analytical queries using Python and SQL.

### ACHIEVEMENT

**TryHackMe — Top 50%**

### CERTIFICATIONS

- **Basics of Ethical Hacking — Simplilearn**
- **Introduction to Cybersecurity — Simplilearn**
- **Introduction to Cybercrime — Simplilearn**
- **TCS iON Career Edge — Young Professional**
- **IBM AI Fundamentals**
- **Cisco Cybersecurity Badge**

### INTERESTS

Cloud Security • Application Security • Web Security • Ethical Hacking • Network Security • Security Research • Data Analysis
